

Technology Skills and Practice for PreK-4 to Grade 3

My younger students are very familiar with my Technology Symbaloo (see screenshot below). You can bookmark this site <https://www.symbaloo.com/mix/academyolptechlab> on your web browser for easy access during our distance learning time period.

Students are particularly familiar with abcya.com (PreK4- grade 3 for core subject skills), owlieboo.com (mouse skills), Hour of Code, Story Maker, and Scratch. Dance Mat Typing (grades 2 and 3) can be great practice for touch typing and proper hand placement on the keyboard. There are many others that your child can use to develop their technology skills as well as their core subject material.

Please allow your child a minimum of 20 to 30 minutes a week to try these different apps. If they make a picture, write a story, create a program, etc. and would like to share with me that would be awesome. You can email me a photo/document at mrraleigh@theacademyolp.org. If your child would like to stay connected with me I would love to have them write an email message and I promise to email back – maybe include a picture of me and my dog Sandy too!

Thank you for your help and understanding during these difficult times. Be well and hope to be back with your children at The Academy soon!

-Mrs. Raleigh
